# VC520 + Conference Camera

Professional Camera for Video Collaboration in Conference Rooms

Excellent Video Conferencing Provider

Best professional camera speakerphone system for video collaboration in mid and large rooms.

### Perfectly Designed for Medium to Large Rooms and 360° Audio Pick-up

The VC520+ is the perfect camera for midsize to large meeting rooms. With its wide field of view everyone can easily fit into frame! The speakerphone is equipped with 3 uni-directional microphones which allow for 360° audio coverage within a 9m range.

### Less Cables Makes Installation So Easy

As the next generation of VCs, the VC520+ eliminates the need for a hub and integrates input and output ports into the camera and speakerphone, making for a more user friendly installation. Say goodbye to your annoying cable chaos!

### PTZ Camera with 18X Total Zoom

Boasting pan-tilt-zoom (PTZ) and 18X zoom, the VC520+ will meet your video collaboration needs in conference rooms large or small alike, regardless of whether you want detailed views of small objects or wide views of all participants. Moreover, its quick auto-focus, fast lens, subtle pan/tilt grading and wide angle ensure an unbeatably smooth and lifelike conferencing experience.

### Easy Plug and Play for Any APP

The VC520+ is incredibly easy to use- simply plug its USB connector into a desktop or laptop and you're ready to go! With no need for device drivers, the VC520+ is able to provide top-quality conferencing at a moment's notice, on nearly any computer.

### Full HD 1080p Output Resolution

Full HD 1080p has never felt more lifelike! Even in poor lighting you can enjoy detailed, crystal-clear views of people and objects at the far site, and motion blur is nonexistent. With quality like this, you'll forget that everyone isn't even in the same room.

### Up to 10 Camera Presets

With the VC520+ there's no need to waste time panning and zooming manually during meetings – simply program its presets ahead of time on the remote control, and then during the meeting you can shift the camera from a wide view of the room to a close-up of an object with just the press a button. With not just 1, but 10 of these presets available, you can prepare yourself for nearly any situation in any environment.
