

Inspiration comes from classic and contemporary European design structures
Carry Forward Traditions and Dare to Innovate

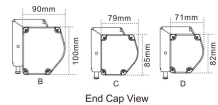

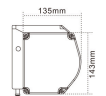

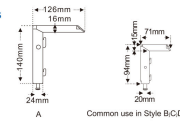

Inspired by renaissance European architecture and ancient Greece Corinthian columns, the Cyber series screens are the result of creative artistic designs. Innovative features such as an extremely easy floating L-bracket installation system and a slow-return/self-lock function (manual pull-down models only) ensure the screen is as functional as its aesthetically pleasing.

2-D View

Cyber Series

Manual / Speed Reduction / Integrated Motorized / Motorized

Manual

Self-Lock Limitless Positioning allows the screen to be adjusted freely

Manual Screen with Speed-Reduction

Grandview's manual screen features the integrated Speed-Reduction and Self-Lock design technology that is patented in many countries. This system features three main benefits as below.

Integrated Motorized

A multi-functional control system includes manual, infrared remote and Cycle-Switch controls. Alternatively it can connect to a computer and also use the external IR receiver cable and sensor.

Integrated Control Interface

Motorized

The motorized screen is safe, and easy to operate and can be controlled directly via the in-line switch.

In-line switch
