

Achieve Your Goals, Wherever You Are

EVC Series: Point-to-Point And Multi-Point Video Conferencing Systems

Why AVer Video Conferencing?

The incredible price-to-performance, trouble-free installation and straightforward operation of our EVC Series translates into a distinctly appealing full HD 1080p video conferencing solution. The range of models in the EVC Series are all H.323 and SIP compatible, including the point-to-point EVC130, EVC130P, the 4-points EVC300 as well as the 10-points EVC900, meaning users are guaranteed to find a video conferencing system that is just right for them. The EVC130 has an excellent 88° wide-angle camera and the EVC130P and our multi-point systems EVC300/EVC900 come equipped with a 67° Pan, Tilt and Zoom camera ensuring everyone participating in the meeting can be seen in great detail. AVer's industry first, one-touch recording allows users to record everything on the screen directly to any flash drive and our EZMeetup software ensures that participants can be reached on their mobile devices when out of the office. The interoperability and simplicity of the EVC Series, coupled with the system's high quality video and audio performance, make it an equally attractive endpoint solution for system integrators, video conferencing as a service (VCaaS) providers, Internet telephony service provider (ITSP), telecoms and more.

Full HD 1080p People Video

Full HD 1080p Content Sharing

88° FOV / 16X PTZ Camera

Up to 10-Way Communication

One-Touch Recording

Connected On-the-Go

Video Conferencing Systems Suitable for Multiple Business Sectors

AVer's award-winning EVC Series can be used across a variety of sectors including business, education, healthcare, manufacturing, finance, legal and many more. AVer's all-in-one EVC Series allows **businesses** to establish face-to-face communication through high resolution video quality, intelligent audio detection, and real-time video and audio delivery across multiple branch offices around the world at the touch of a button. For **legal** purpose, the EVC Series allows professionals to deliver expert testimony remotely as well as allowing key witnesses and defendants to deliver their testimony from a safe, distant environment. **Healthcare** applications include patients being able to receive counselling from doctors at home or from other hospitals. Alternatively, an expert doctor can look at an X-Ray or discuss with a patient through the video conferencing system if the doctor isn't able to attend in person. AVer's video conferencing solutions allow **educational institutions** to go on virtual fieldtrips and interact with students from different countries and cultures. In the **finance & banking** sector, AVer's video conferencing solutions allow banks to save costs by cutting down on lost time and travel expenses as well as allowing customers to interact remotely with bank staff, getting the personalized service their customers desire. Within the **manufacturing** sector, users can increase operational efficiency by holding meetings across all stages of manufacturing, from the chairperson, research and development right the way down to the factory floor, ensuring a smooth operating process. With AVer's EVC Series, whatever line of work you are in, our EVC Series is guaranteed to be able to provide the ideal solution for your business.

Business
